FLIGHT CARD

Generated on 21 November 2026

Aubrac plateau

Water · Lozère

GPS coordinates	44.61491, 3.13763
Elevation	1,242 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Base ULM des Bories 16 km SE · spot 544 m higher
Spot reference	314195

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

Lake Saint-Andéol is one of the many lakes of the Aubrac, located in the commune of Marchastel in the northwest of the French department of Lozère. Of glacial origin, Lake Saint-Andéol has been a place of worship for various cults since protohistoric times. Lake Born is located in the communes of Les Salces and Marchastel, on the Aubrac plateau. With an area of 151 hectares, it is surrounded by wetlands and peat bogs, which give it its ecological interest. They are home in particular to populations of European otter, Eurasian curlew, round-leaved sundew, floating water-plantain, ... all protected and/or threatened species that live in these exceptional areas. It is not unusual to come across herds of Aubrac cows all around the lake. Besides its rich biodiversity, Lake Born offers a panorama typical of the landscapes of the Aubrac plateau.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
