Mont Boussuivre, 42780 Violay

Heritage · Loire

GPS coordinates	45.85121, 4.38095
Elevation	997 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Villefranche-Tarare Airport (LFHV) 21 km E · spot 669 m higher
Spot reference	314361

Aérodrome de Feurs - Chambéon	Aerodrome	22 km SW	334 m

Description

A 360° panorama, the highest point of the Monts du Lyonnais. A walk of about thirty minutes through the woods is all it takes to reach the imposing tower. The Matagrin Tower is located in Violay, a charming mid-mountain village awarded the "Village Sport Nature" label by the Loire department. Once you're there, all that's left is to climb the 65 steps of its famous spiral staircase to reach the top! Renovation work has given it back its "hat", and a viewpoint indicator invites you to pick out our regions: the Roannais, the Pilat, the Forez, but also the Beaujolais, the Alps, the Bugey and the Lyon plain. On a clear day you can see up to 14 departments. Fabulous, isn't it?

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
