Rimbach pass

Mountain · Haut-Rhin

GPS coordinates	47.84298, 6.97947
Elevation	912 m
Maximum height	50 m max
Access	On foot > 1,000 m
Nearest aerodrome	La Tête Des Champs Altiport 14 km NW · spot 58 m lower
Spot reference	314407

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:12	07:47	16:49	17:23	9 h 02	07:47–08:36 · 16:00–16:49

La Tête Des Champs Altiport	Aerodrome	14 km NW	970 m
Ramonchamp ULM	Aerodrome	18 km W	577 m
Belfort Chaux Airfield	Aerodrome	19 km SW	417 m

Description

The Rimbach pass is located in the commune of Rimbach les Masevaux in the Vosges, next to the Bellaker farm inn. Altitude: 940 m. A lovely place that can be reached from the Mollau side or from the Masevaux valley via a nice walk climbing up to the heights. The little chalet is a great spot for a meal break before continuing on to various destinations. Accessible on foot or by mountain bike on beautiful, well-marked paths. A walk worth doing, I recommend it.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
