Ploubazlanec, the Kerroc'h tower

Heritage · Côtes-d'Armor

GPS coordinates	48.79058, -3.03411
Elevation	21 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Base ULM de Kerfot 7.4 km S · spot 78 m lower
Spot reference	314420

Description

The "Tour de Kerroc'h" is an unusual structure that has become the usual emblem of the municipality of Ploubazlanec. Built in the last century on top of the hill then called Krec'h Mahaf or Mazé, meaning Mathieu, it offers a view over the Bay of Paimpol. Exceeding the hopes of Abbé Guennou, who thought of putting up a simple statue of Mary there, a granite tower was erected on the mound, first topped with a statue of Saint Anne and later with one of the Virgin and Saint Joseph with the Child Jesus.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
