Spot location and restrictions (Drone-Spot map image)

## Sun (local times, UTC+01:00)

| Day | Dawn | Sunrise | Sunset | Dusk | Day length | Golden hour |
|---|---|---|---|---|---|---|
| **Sat 21 Nov** | 07:57 | 08:32 | 17:29 | 18:04 | 8 h 56 | 08:32–09:23 · 16:38–17:29 |
| **Sun 22 Nov** | 07:59 | 08:34 | 17:28 | 18:03 | 8 h 54 | 08:34–09:25 · 16:37–17:28 |
| **Mon 23 Nov** | 08:00 | 08:35 | 17:27 | 18:02 | 8 h 51 | 08:35–09:26 · 16:36–17:27 |

## Nearby aerodromes

| Aerodrome | Type | Distance | Elevation |
|---|---|---|---|
| Centre Hospitalier Heliport | Heliport | 14 km E | 28 m |
| Lannion-Côte de Granit Airport | Airport | 15 km NE | 88 m |
| Morlaix-Ploujean Airport | Airport | 16 km SW | 83 m |

## Description

Pors ar Villiec beach is the second beach in the center of Locquirec (200 m away), but it is less in view than the harbor beach because it faces north and is sometimes windier. Partly for this reason, it is a very popular surf spot, even though it is also a favorite with families, as it is larger than the harbor beach and better suited to beach games. After a strong tide or a particular swell, it is often strewn with seaweed, which is cleared fairly quickly since it is close to the center. To get to this beach from the center of Locquirec, follow the D64 toward the pointes. After the bend, you will find a large free car park on the right near the beach.

**Scan to open the up-to-date spot page: weather, map and restrictions.**

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

# Preparing the flight

## Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

## Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

*Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.*
