Aerodrome	Type	Distance	Elevation
La Tête Des Champs Altiport	Aerodrome	15 km W	970 m
Ramonchamp ULM	Aerodrome	21 km W	577 m

Description

The Markstein, an emblematic place in the Vosges at 1,265 meters of altitude. Located between the Grand Ballon and the Treh (above Wildenstein), the Markstein is a beautiful ski resort in the Vosges, offering activities in winter and summer (bike park, summer toboggan run, etc.) as well as the starting point for many walks and sights in Alsace. Easy to reach by car, with a car park available from which many walks start, to the great pleasure of hikers, it is a place not to be missed as a tourist, with the bonus of the Alsace plain on the Guebwiller side opening up the landscape. The Markstein web page: https://www.lemarkstein.net/fr/ The Wikipedia page: https://fr.wikipedia.org/wiki/Le_Markstein

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
