## Description

Sergio Leone's film "Duck, You Sucker!" (Il était une fois la révolution) is famous for its spectacular action scenes made without modern special effects. The explosion of the stone bridge in this film is a remarkable example of the mastery of Leone and his team in staging. In this memorable scene, the explosion of the bridge is a true demonstration of cinematic ingenuity. First, the camera captures the immensity of the bridge, with its majestic stone arches and imposing structure. Sunlight plays on the textures of the stones, creating a palette of warm colors ranging from gray to golden brown. Suspense builds as the main characters stand on the bridge, preparing for the inevitable. The tension is palpable, heightened by the haunting music of the soundtrack. The explosion does not happen immediately, giving the audience time to take in the beauty of the setting and the anticipation of …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

# Preparing the flight

## Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

## Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

*Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.*
