Description

Lake Creno Located at 1,310 m altitude in the Monte Rotondo massif, in Corse-du-Sud, the magnificent Lake Creno is the only glacial lake in Corsica surrounded by a forest of laricio pines. This wooded setting and the water lilies partially covering it make it a truly different lake from the others, of incredible beauty. This grand lake is reputed to be the easiest-to-reach mountain lake on the island, so it is very busy in the summer. Relatively easy, this must-do family hike, taken from the book "30 balades en famille en Corse-du-Sud" by Laurent CHABOT, is one of the hikes not to be missed. It's really THE hike to do! This charming lake is of course the idyllic spot for a picnic break, but beware of the wild pigs eager for food, known to lurk in this spot. #drone #lac #corse #djimini2 Social Media Instagram : / pgdrone Youtube : / @pgdrone Royalty-free music: Song: Markvard - Life Is a …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
