Corsica - Pozzine Bastelica, a Place of Incredible Beauty

Mountain · Corse

GPS coordinates	42.03634, 9.13703
Elevation	1,786 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Aérodrome de Ghisonaccia - Alzitone (LFKG) 22 km E · spot 1,732 m higher
Spot reference	314614

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	06:50	07:21	16:58	17:28	9 h 37	07:21–08:03 · 16:15–16:58
Sun 22 Nov	06:51	07:22	16:57	17:28	9 h 35	07:22–08:05 · 16:14–16:57

Aérodrome de Ghisonaccia - Alzitone	Aerodrome	22 km E	54 m
Base ULM d'Aghione Casone	Aerodrome	24 km E	51 m

Description

Pozzine Bastelica A fairly physically demanding hike, 12 km in the mountains, quite a lot of elevation gain, 5 hours round trip, but so many magnificent and varied landscapes, encounters with lots of animals, not a sound except the song of the birds and the streams... Les Bergeries des Pozzi The Pozzines (from the Corsican i Pozzi, meaning Wells) are acidic peat grasslands crossed by small streams with winding courses. They are located at altitudes between 1700 and 2300 meters. They occupy depressions formed by former glacial lakes; they result from the filling of these lakes by clay deposits and by large amounts of dead plants. In Corsica, the deposits of the oldest pozzines date back about 12,000 years. Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
