Piney Dam

Unusual · Loire

GPS coordinates	45.42536, 4.52618
Elevation	559 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Centre Hospitalier Heliport 5.7 km N · spot 178 m higher
Spot reference	314624

Spot location and restrictions (Drone-Spot map image)

Hôpital Bellevue Heliport	Heliport	11 km W	595 m

Description

Piney dam with an artwork by Ella & Pitr, located above the town of Saint-Chamond in the Pilat massif An atypical dam with no reservoir... The river passes through a gaping hole and, of course, no longer acts as a dam. It can be seen above St Chamond in the Loire département. It sits next to two other dams that are still operational. The Piney dam, 199 meters long and 45 meters high, is a hydraulic dam of the Département de la Loire located in the commune of La Valla-en-Gier. The Piney dam was built in 1955 across the Gier River and holds a volume of 1,900 thousand m³ of water over an area of 14 hectares. The Piney dam, an arch dam, was mainly used for water supply. This dam is now decommissioned. It is completely dry thanks to a sluice built at its base. A huge artwork by Ella & Pitr is drawn on one of its faces. If anyone knows why it was decommissioned, I'd love to hear it! Cinematic ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
