FLIGHT CARD

Generated on 21 November 2026

Cize-Bolozon Viaduct

Heritage · Ain

GPS coordinates	46.21546, 5.45130
Elevation	267 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Bourg-Ceyzériat Airport (LFHS) 12 km W · spot 6 m higher
Spot reference	314748

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:15	07:48	17:01	17:34	9 h 13	07:48–08:35 · 16:13–17:01
Sun 22 Nov	07:16	07:49	17:00	17:33	9 h 10	07:49–08:36 · 16:12–17:00
Mon 23 Nov	07:17	07:50	16:59	17:32	9 h 08	07:50–08:38 · 16:11–16:59

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Bourg-Ceyzériat Airport	Aerodrome	12 km W	261 m
Aérodrome d'Oyonnax-Arbent	Aerodrome	18 km NE	535 m
La Tranclière Private Airstrip	Aerodrome	18 km SW	250 m
Corlier Altiport	Aerodrome	20 km S	842 m

Description

This viaduct, 269 m long and 52 m high, spans the Ain river and has two levels: the lower deck for road traffic and the upper deck for rail traffic. The Paris-Geneva TGV has crossed this viaduct since December 12, 2010. A first viaduct of stones bound with lime was built in 1875 to allow easy crossing of the Ain river. In 1876, the so-called Carpathian line, crossing steep terrain, was opened. Following a Resistance action, it was destroyed in 1944. The second viaduct was built in 1950 in an almost identical way, with the stone replaced by concrete and used only as facing.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
