FLIGHT CARD

Generated on 21 November 2026

Île Grande, Pleumeur-Baudou

Water · Côtes-d'Armor

GPS coordinates	48.80334, -3.58792
Elevation	0 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Lannion-Côte de Granit Airport (LFRO) 10 km SE · spot 88 m lower
Spot reference	314777

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:57	08:32	17:28	18:03	8 h 55	08:32–09:23 · 16:37–17:28
Sun 22 Nov	07:59	08:34	17:27	18:02	8 h 53	08:34–09:25 · 16:36–17:27
Mon 23 Nov	08:00	08:35	17:26	18:02	8 h 50	08:35–09:27 · 16:35–17:26

Lannion-Côte de Granit Airport	Airport	10 km SE	88 m
Centre Hospitalier Heliport	Heliport	13 km SE	28 m

Description

With the tides, Île Grande shows its different faces and makes the various islands around it accessible or not. A 7 km coastal path, marked GR, lets you walk around the island in about 2h30. These small paths and trails along the sea will take you past the little port of Saint-Sauveur, the Kervoalant marshes, pebble or fine sand beaches, the Toul gwenn dunes, the legendary Canton and Aval islands, Île Morvil, the rocher du corbeau, the allée couverte (passage grave) and the Saint Sauveur fountain. You can find this route in these editions: Balades en Trégor, route no. 17 Topoguide FFRP. You can also find this route in the Topoguide – Les Côtes-d'Armor à pied (2020 edition).

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
