FLIGHT CARD

Generated on 21 November 2026

Île de Bréhat

Water · Côtes-d'Armor

GPS coordinates	48.86383, -2.99711
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Base ULM de Kerfot 16 km S
Spot reference	314872

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

Just a narrow arm of the sea, a ten-minute boat ride from the pointe de l'Arcouest in Ploubazlanec to Bréhat, and you find yourself in another dimension. Here, time stands still! Mild climate, colors, landscapes... let yourself be enchanted by the magic of the island of flowers. Discover Bréhat Forget the car. There are no motor vehicles here; you get around only by bike or on foot. It's an ideal pace for exploring the island along any of its five hiking trails. Small in size (3.5 km long, 1.5 km wide), Bréhat is full of surprises. With its two islands linked by the Vauban bridge, going from south to north is already a journey in itself. In the south, you'll find the port, the beach, and the village with its lively square, its proud privateers' houses and its 16th-century church. In the north, purple moorland and stone walls have a hint of Ireland about them. Give yourself a day, ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
