Nîmes-Arles-Camargue Airport	Airport	22 km S	94 m
Aérodrome d'Avignon-Pujaut	Aerodrome	22 km E	45 m

Description

Collias is a village on the left bank of the Gardon, equidistant from the Pont-du-Gard and Uzès. For locals, Collias is synonymous with river leisure: swimming and kayak or canoe trips in the Gorges du Gardon. Collias Collias The road to Nîmes crosses the river on a spectacular bridge built in 1922. Upstream from Collias, the Gorges du Gardon are wild, as the river cuts into the limestone plateau and forms remarkable gorges. The landscape is spectacular: you can paddle a canoe down the river or follow the gorges on foot along a trail and stop at a quiet spot to enjoy a swim and soak up the sun. Collias is also a climbing hub, and the steep cliffs of the gorges are a popular meeting point for climbers. A via ferrata has been set up. Downstream, the Gardon widens and flows toward the Pont du Gard, 8 kilometers away, making for an easy canoe trip that is very pleasant to do with the family.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
