FLIGHT CARD
Generated on 21 November 2026

Château de Crussol - St-Péray (07)

Heritage · Ardèche

GPS coordinates	44.93854, 4.85257
Elevation	338 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Centre Hospitalier Heliport 4.9 km SE · spot 190 m higher
Spot reference	315049

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Relais Du Soleil Heliport	Heliport	14 km E	221 m
Centre Hospitalier Heliport	Heliport	18 km NE	160 m

Description

Now in ruins, Crussol Castle, located in the Ardèche, was built on a height overlooking the Rhône valley, facing the city of Valence in the Drôme. It stands on what was once an important river transport route and on the Way of St. James to Santiago de Compostela. Perched on the ridge of the Crussol mountain, on the edge of a plateau slope more than 200 meters high, the castle overlooks the towns of Saint-Péray to the west, and Guilherand-Granges and Valence to the east. It covers three hectares and includes "la Villette", a group of about 140 houses, as well as the castle itself at the top of the hill, all surrounded by ramparts that are still clearly visible, especially at the back where a tower rises.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
