Lac de la Forestière in Manosque

Water · Alpes-de-Haute-Provence

GPS coordinates	43.81355, 5.83000
Elevation	291 m
Maximum height	50 m max
Access	Direct access by car
Nearest aerodrome	Aérodrome de Vinon (LFNF) 9.2 km SW · spot 16 m higher
Spot reference	315050

Description

5 minutes from the motorway exit, the 9 ha of La Forestière (on a 23 ha site) are one of those small havens of freshness that delight local anglers and visitors alike. A former gravel pit of the A51 motorway, La Forestière fishing lake is fed by the alluvial water table and the La Forestière stream, via the Vannades overflow, which gives it very good quality water. Seen from a plane it looks like a heart, so it is probably no coincidence that its islands and shaded banks give it such a bucolic feel. Second-category lake. Managed by the AAPPMA la Gaule Oraisonnaise. All fishing methods: no particular restrictions on hooks across the whole lake, no-kill only for carp (cyprinus carpio) and black bass (micropterus salmoides). Night carp fishing is allowed only on the 1st weekend of the month, from Friday 05 April to Monday 09 December.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
