Giant sequoia avenue of Ferrières en Brie

Heritage · Seine-et-Marne

GPS coordinates	48.81599, 2.69813
Elevation	115 m
Maximum height	50 m max
Access	Direct access by car
Nearest aerodrome	Lognes Emerainville (LFPL) 5.3 km W · spot 5 m higher
Spot reference	315083

Spot location and restrictions (Drone-Spot map image)

Centre Hospitalier Henri Mondor Heliport	Heliport	18 km W	49 m

Description

Avenue of giant sequoias on the edge of the Ferrières-en-Brie forest. There is a 50 m limit at the car park on the D471, at the end of the row of sequoias, but you are right at the edge of an unrestricted zone. Some really beautiful views to capture above the forest and flying over the avenue of sequoias. There are also open spaces along the edge of the avenue. Be careful, the trees are tall (it's wise to fly above 40 m, even 50 m to be safe). I lost contact with my DJI Mini 2 several times while it was less than 400 m away, but it's probably due to the many trees there. RTH worked well every time :)

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
