Lac des Allivoz - Décines-Charpieu (69)

Water · Ain

GPS coordinates	45.80112, 4.98023
Elevation	170 m
Maximum height	30 m max
Access	On foot < 1,000 m
Nearest aerodrome	Lyon-Bron Airport (LFLY) 8.7 km S · spot 31 m lower
Spot reference	315104

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Aérodrome de Lyon - Corbas	Aerodrome	17 km S	198 m

Description

A former gravel pit worked in the early 1980s, the Allivoz lake was later "renaturalized" in its southern part to create a mosaic of habitats favorable to aquatic biodiversity. This created gentle slopes, more or less emergent and vegetated islets, and reed beds in which many remarkable bird species breed. Since then, the vegetation has grown and this body of water offers a very natural landscape in its southern area; it is now a home for many species such as the European Beaver, the Kingfisher, the Purple Heron and the Great Reed Warbler, which nests exclusively in reeds. The Lac des Allivoz bears the historical name of the area, which later and by extension gave its name to the water and nature center of the Grand Parc: L'îloz'.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
