Maspalomas Dunes

Unusual · Spain

GPS coordinates	27.74040, -15.57883
Elevation	4 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	El Berriel Aeroc Airport (GCLB) 8.5 km NE · same altitude as the spot
Spot reference	315118

Spot location and restrictions (Drone-Spot map image)

Description

Flying my drone by day and by night let me capture incredible images of Maspalomas from different angles. By day, the wild landscapes and dunes seemed to stretch on forever, offering a breathtaking view. At night, the lights of the city and those of the Yumbo center created a magical, fairy-tale atmosphere. Whether flying over natural landscapes or lively urban areas, every drone flight revealed a new side of this fascinating destination. Maspalomas will stay forever etched in my memory as a place where adventure and beauty meet at every moment. #DronePhotography #Maspalomas #AventureMagique #PaysagesÉpoustouflants #VolDeNuit #DunesInfinies #ExplorationUrbaine #SouvenirsInoubliables #Maspalomas #GranCanaria #GrandesCanaries #spain #españa #espagne #Yumbo #Drone #Dji #vacances #dunes #plage #Oasis #nature

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
