Roquefavour Aqueduct

Heritage · Bouches-du-Rhône

GPS coordinates	43.51868, 5.31299
Elevation	185 m
Maximum height	30 m max
Access	On foot > 1,000 m
Nearest aerodrome	Aix - Les Milles Airport (LFMA) 4.7 km E · spot 73 m higher
Spot reference	315194

Description

The Arc is a coastal river in the south of France, in the Provence-Alpes-Côte d'Azur region, which rises at the western end of the Var and mainly runs along the Bouches-du-Rhône département through the Aix-en-Provence area, a town it also flows through. It flows into the Étang de Berre. The Arc rises between Saint-Maximin-la-Sainte-Baume and Pourcieux (Var) at an altitude of 493 meters, at the foot of Mont Aurélien (879 m), and flows into the Étang de Berre (Bouches-du-Rhône) through a small delta. It is 82.9 km long with an average gradient of less than 1%. It occupies an east-west oriented depression. If the Romans were still around, they would no doubt proudly claim the Roquefavour aqueduct as their own. Inspired by the Pont du Gard, it is today the largest stone aqueduct bridge in the world. Almost 400 meters long, it has tirelessly carried the water supplying Marseille and its …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
