FLIGHT CARD

Generated on 21 November 2026

The Bimont Dam

Water · Bouches-du-Rhône

GPS coordinates	43.54007, 5.53899
Elevation	353 m
Maximum height	50 m max
Access	Direct access by car
Nearest aerodrome	Pays d'Aix Medical Center Heliport 7.8 km W · spot 131 m higher
Spot reference	315558

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:08	07:39	17:08	17:39	9 h 29	07:39–08:23 · 16:24–17:08
Sun 22 Nov	07:09	07:40	17:07	17:39	9 h 27	07:40–08:25 · 16:23–17:07

Aix - Les Milles Airport	Aerodrome	14 km W	112 m
Saint Suffren private UL strip	Aerodrome	22 km NW	270 m
Nord Heliport	Heliport	23 km SW	187 m

Description

At a height of 87 meters, the Bimont Dam, built from 1946 to 1952, is the most recent of the dams in the massif. The structure permanently holds between 11 and 14 million m3 of water. It supplies the large industrial and urban centers of the Arc valley and Marseille. It stores both runoff water from the massif and part of the water coming from the Verdon through the Campane gallery. But the construction of the Canal de Provence reduced the importance of this structure, which today serves mainly as a storage and safety reserve.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
