FLIGHT CARD

Generated on 21 November 2026

Chapelle Ste Philomène in Montmaure

Heritage · Hautes-Alpes

GPS coordinates	44.56087, 5.87480
Elevation	878 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Aérodrome d'Aspres-sur-Buëch (LFNJ) 12 km SW · spot 47 m higher
Spot reference	315681

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:09	07:41	17:04	17:36	9 h 23	07:41–08:26 · 16:19–17:04
Sun 22 Nov	07:10	07:42	17:03	17:35	9 h 21	07:42–08:28 · 16:18–17:03

Hôpital Heliport	Heliport	16 km E	759 m
Serres - La Bâtie-Montsaléon Airfield	Aerodrome	16 km SW	715 m

Description

Built on a circular mound, it was probably the parish church until the 16th century (when the village church was built). In poor condition at the start of the 19th century, it was restored after the miracle of 1838 for pilgrimages. This restoration had the effect of reducing the Romanesque-style building, which had a Latin cross plan measuring 22.40 meters by 14.50 meters, by removing both arms of the transept, as well as part of the nave and the façade. Listed in the inventory of historic monuments, all that remains of this church is a single bay covered by a semicircular barrel vault. To the left of the façade and at the back of the building, the ruins of one of the former side chapels still remain. Finally, worth noting is the grave of Antoine Mauduis, a hero of the Resistance and companion of President Mitterand, in front of the main façade.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
