Le Grand Colombier - Virieu-le-Petit

Mountain · Ain

GPS coordinates	45.90748, 5.76267
Elevation	1,413 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Grand Colombier Heliport 2.9 km S · spot 24 m lower
Spot reference	315694

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Base Hydro-ULM Rhône Lavours	Seaplane base	11 km S	239 m
Lavours	Aerodrome	12 km S	234 m

Description

The Grand Colombier is an iconic summit of the Jura massif, located in the Ain department. This 1,534-meter giant offers breathtaking panoramas over the Alps and the Bugey. Very popular with cyclists, the climb of the Grand Colombier pass is known for its difficulty, with slopes sometimes exceeding 20%. But the effort is rewarded with an unbeatable view and an incomparable feeling of freedom. The Grand Colombier is also a paradise for hikers, who can enjoy marked trails and discover unspoiled nature. Close to CULOZ

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
