Aérodrome d'Aspres-sur-Buëch	Aerodrome	21 km W	831 m

Description

Lac de Pelleautier, located in the town of the same name, is a must-visit spot for nature and relaxation lovers. Nestled at the foot of the mountains, it offers an idyllic setting to recharge with family or friends. While Lac de Pelleautier is a peaceful and pleasant place, the question arises whether you can swim there. The answer is yes! The lake has a developed beach, allowing visitors to enjoy the clear, refreshing water. However, it's important to note that swimming is unsupervised, so you need to be careful and follow the safety rules. Besides swimming, Lac de Pelleautier offers a variety of activities for all tastes. Anglers can indulge their passion in peace, as the lake is home to many species of fish. For hiking fans, the lake is also the starting point for several walking routes. Lac de Pelleautier has a feature that sets it apart from the other lakes in the area: it is the …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
