FORT LOUVOIS - Bourcefranc-Le-Chapus (17560)

Water · Charente-Maritime

GPS coordinates	45.85501, -1.16976
Elevation	1 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Aérodrome de Marennes - Le Bournet (LFJI) 7.9 km SE · same altitude as the spot
Spot reference	315817

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

I take you on a discovery of the majestic Fort Louvois, an architectural gem of Charente-Maritime, captured with a DJI Mini 4 Pro. In this aerial video: - Fort Louvois, a maritime fortress built under Louis XIV, at low or high tide, surrounded by the sparkling waters of the Atlantic. - The foot of the Île d'Oléron Bridge, offering a striking view of the link between the mainland and the famous island. - The port of Bourcefranc-le-Chapus, with its typical oyster huts and authentic maritime atmosphere. Edited with Filmora 14 (Wondershare), this video highlights the unique charm of this place, between historical heritage and natural beauty. Discover the golden light of a late afternoon by the sea and let yourself be carried away by the serenity of the surrounding landscapes. Like , comment and subscribe for more aerial journeys! Charente-Maritime: a region to explore differently, thanks to ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
