The Pointe de Kerpenhir

Water · Morbihan

GPS coordinates	47.55416, -2.92875
Elevation	9 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Quiberon Airport (LFEQ) 15 km SW · same altitude as the spot
Spot reference	315823

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:51	08:25	17:30	18:04	9 h 04	08:25–09:14 · 16:41–17:30
Sun 22 Nov	07:53	08:27	17:29	18:03	9 h 02	08:27–09:16 · 16:40–17:29

Description

The Pointe de Kerpenhir is a must-see in the Gulf of Morbihan. This headland in Locmariaquer marks the entrance to the Gulf of Morbihan. This breathtaking viewpoint over Port-Navalo is also an ideal place to relax. Here, you can enjoy beautiful beaches and walks. So, off you go for a salty sea-air getaway! Discovering the Pointe de Kerpenhir The entrance to the Gulf of Morbihan From the Pointe de Kerpenhir, you can admire the entrance to the Gulf of Morbihan. It is here, between Arzon and Locmariaquer, that the Petite Mer meets the ocean and vice versa. The view is exceptional, notably with the Port-Navalo lighthouse. Worth discovering in every season! The statue of Notre-Dame de Kerdro The statue you see at the Pointe de Kerpenhir in Locmariaquer is that of Notre-Dame de Kerdro. This granite statue is 2.70 meters high. The original having been destroyed, this one is relatively recent …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
