National Monument of the Resistance - Plateau des Glières

Mountain · Haute-Savoie

GPS coordinates	45.96523, 6.33602
Elevation	1,440 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Altiport du Col de Cenise 11 km NE · spot 284 m lower
Spot reference	315839

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sun 22 Nov	07:12	07:45	16:57	17:30	9 h 12	07:45–08:32 · 16:10–16:57
Mon 23 Nov	07:13	07:46	16:56	17:29	9 h 10	07:46–08:33 · 16:09–16:56

Altiport du Col de Cenise	Aerodrome	11 km NE	1,724 m
Centre Hospitalier Heliport	Heliport	18 km SW	485 m
Annecy-Haute-Savoie-Mont Blanc Airport	Airport	18 km W	464 m
Altisurface de Saint-Roch Mayères	Aerodrome	19 km E	1,560 m

Description

The Glières Plateau, a landmark of the Resistance, was chosen by the Allies as a parachute drop zone during the Second World War. The Historic Trail is a discovery route of about two hours in the center of the plateau and traces the organization and daily life of the Glières battalion during the winter of 1944. The Glières Monument was built in 1973 by Emile GILIOLI. It was erected on the initiative of the survivors of Glières. It symbolizes resistance and hope. Inside the monument you will find other works by the artist. In winter, it is a paradise for cross-country skiing. Near THORENS-GLIÈRES

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
