Quiberon peninsula, the Port Blanc arch

Water · Morbihan

GPS coordinates	47.52175, -3.14904
Elevation	16 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Quiberon Airport (LFEQ) 5.7 km SE · spot 5 m higher
Spot reference	315862

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:52	08:26	17:31	18:05	9 h 04	08:26–09:15 · 16:42–17:31
Sun 22 Nov	07:53	08:28	17:30	18:04	9 h 02	08:28–09:17 · 16:41–17:30
Mon 23 Nov	07:55	08:29	17:29	18:03	9 h 00	08:29–09:18 · 16:40–17:29

Description

The Port-Blanc Arch, also known as Roche Percée, is a remarkable natural site on the wild coast of Saint-Pierre Quiberon. This spot is the result of marine erosion, which carved an arch into the cliff. Visitors can walk under this arch at low tide. Unfortunately, this spot has been weakened in recent years by successive storms. This has caused the loss of several rocks. No one can say for sure how long this arch will withstand the storms before disappearing, but let's hope it will be as long as possible. The Port-Blanc Arch is a symbol of the power of nature and the beauty of the wild coast of Saint-Pierre Quiberon. It is a must-see for hikers, nature lovers and photographers. We hope future generations will have the chance to discover this wonderful site. Pointe du Percho: From there, you will have a beautiful view of the Wild Coast, the Penthièvre isthmus, its fort and its beach, …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
