FLIGHT CARD

Generated on 21 November 2026

Île d'Arz

Water · Morbihan

GPS coordinates	47.58356, -2.81003
Elevation	6 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Chubert Centre Hospitalier Heliport 10 km NE · same altitude as the spot
Spot reference	315955

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Quiberon Airport	Aerodrome	25 km SW	11 m

Description

WHAT TO SEE ON ÎLE D'ARZ? With its 16 km of coastal paths (pedestrians only), its cycling route and its magnificent beaches, Île d'Arz, at 330 hectares, is the "nature" island par excellence. It is a paradise for hikers and nature lovers, with a pretty beach or a pretty village always waiting at the end of the path. In the wild north of the island, home to a great variety of birds, the boundary between land and sea becomes blurred... In the south, there are multiple viewpoints over the surrounding islands, and a dreamy beach for swimming, windsurfing and kitesurfing. And in the center, the village, with its charming lanes, its church and its pretty houses. THE ISLAND OF CAPTAINS From the 17th century on, thanks to the proximity of major ports such as Nantes and Lorient, it was deep-sea sailors who made the island's reputation. It saw generations of sailors and captains born who devoted ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
