Moulinet, chapelle N.D de la Ménour

Heritage · Alpes-Maritimes

GPS coordinates	43.92224, 7.41174
Elevation	684 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Casa del Mare Helipad 18 km S · spot 679 m higher
Spot reference	316134

Avenue Douine Heliport	Heliport	20 km S	44 m

Description

An exceptional site, located between Sospel and Moulinet, on the Route des Grands Alpes. This sanctuary with its dizzying staircase (listed as a Historic Monument in 1937) overlooks the gorges of the Bévéra valley. Show less A place of pilgrimage, the chapel has been altered over the centuries. Its oldest elements date from the 12th century. It has 2 apses of different ages. The Romanesque chapel was not oriented and defended the approaches to the Château de La Menour. The chapel was rebuilt in the second half of the 17th century with the choir to the east. It was restored in 2019. The chapel is open on request, through the Moulinet town hall. We advise you to plan your visit to the chapel ahead and to contact the town hall the day before at the latest.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
