Barrage et centrale hydro-électrique de Brégnier-Cordon - Brégnier-Cordon

Water · Ain

GPS coordinates	45.65395, 5.60693
Elevation	208 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Belley - Peyrieu Airfield (LFKY) 8.1 km NE · spot 17 m lower
Spot reference	316138

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

The Brégnier-Cordon dam and power plant, set on the Rhône at the entrance to the left arm of the river, was built in prestressed concrete with a total opening of 83 m, comprising four spans of 18 m (fitted with radial gates), separated by piers 2.80 m thick. The power plant attached to it on the right bank contains two bulb turbine units. Upstream, the 4.45-meter-wide bridge, with prestressed concrete beams, carries a two-lane roadway (alternating traffic) of 3.50 meters. Near BELLEY

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
