Jonage dam - towpath

Water · Rhône

GPS coordinates	45.79404, 5.03036
Elevation	181 m
Maximum height	30 m max
Access	Direct access by car
Nearest aerodrome	Lyon Saint-Exupéry Airport (LFLL) 8.6 km SE · spot 69 m lower
Spot reference	316171

Spot location and restrictions (Drone-Spot map image)

Aérodrome de Pérouges - Meximieux	Aerodrome	15 km NE	214 m

Description

This dam belongs, along with the Jons dam and the Cusset plant, to the Cusset hydroelectric scheme. It is part of the original development from the late 19th century, designed to supply the downstream plant and regulate the flow of the canal. Although the dam is located almost entirely in the municipality of Meyzieu, it bears the name of the neighboring municipality of Jonage, and that of the canal it crosses. → Flying over the dam itself is prohibited (see the Géoportail map), and if you want to take photos from downstream, you should go to the other bank by crossing the canal via the Meyzieu bridge. Near MEYZIEU

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
