Le Garlaban

Mountain · Bouches-du-Rhône

GPS coordinates	43.33417, 5.55623
Elevation	586 m
Maximum height	30 m max
Access	On foot < 1,000 m
Nearest aerodrome	Zi Les Paluds Heliport 6.5 km SE · spot 470 m higher
Spot reference	316185

Spot location and restrictions (Drone-Spot map image)

Description

Hills and small valleys carpeted with garrigue Made up of limestone rock, the massif peaks at 731 meters above sea level at the Butte des Pinsots. However, it takes its name from another prominence, the Garlaban, whose distinctive shape and gleaming white cliffs catch the eye. Other summits also draw attention and have evocative names. Tête Ronde owes its name to its rounded shape, while the Grande Tête Rouge refers to the color of its bauxite-rich soil. The Taoumé peak, for its part, is famous for the cave that runs right through it. The Garlaban massif once had large wooded areas and vast pine forests, which remain in some small valleys and on some slopes with woods of Aleppo pine, Scots pine, holm oak and downy oak. Garrigue now rules its hills, made up of low-growing plants, mostly fragrant: a hike in the Garlaban massif intoxicates you with the scents of juniper, rosemary, thyme and …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
