Rousson, the Castellas site

Heritage · Gard

GPS coordinates	44.20220, 4.14991
Elevation	260 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	La Grand'combe Airfield (LFTN) 12 km NW · spot 242 m lower
Spot reference	316246

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:15	07:47	17:12	17:44	9 h 25	07:47–08:32 · 16:27–17:12
Sun 22 Nov	07:16	07:48	17:11	17:43	9 h 23	07:48–08:33 · 16:26–17:11
Mon 23 Nov	07:17	07:49	17:10	17:42	9 h 21	07:49–08:34 · 16:25–17:10

La Grand'combe Airfield	Aerodrome	12 km NW	502 m
Aérodrome d'Alès Cévennes	Airport	15 km S	204 m
Uzès Airfield	Aerodrome	24 km SE	270 m

Description

The Castellas peak rises to an altitude of 401 meters. This site played a defensive and control role very early on. Its location first attracted prehistoric peoples. The "Wolf Cave" on the north slope probably served as an observation post against the approach of potential enemies. In Celtic times, the peak was occupied by a Gaulish oppidum; several dry-stone enclosures blocked the south face, and the remains of dwelling foundations dating from that period can still be found. Later, the oppidum was reoccupied during the Gallo-Roman period. In the early Middle Ages, the first families of farmers, masons, carpenters and blacksmiths settled around this rocky outcrop, building a feudal castle on an old Gallo-Roman citadel. Today all that remains is a section of local limestone wall, a relic of a small private chapel nestled between the base of the keep and the cliff. Filled with serenity, …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
