The carrelets of Île Madame

Water · Charente-Maritime

GPS coordinates	45.95682, -1.11042
Elevation	6 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Rochefort-Saint-Agnant (BA 721) Airport (LFDN) 12 km SE · spot 12 m lower
Spot reference	316409

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:40	08:13	17:28	18:00	9 h 14	08:13–09:00 · 16:41–17:28
Sun 22 Nov	07:41	08:14	17:27	18:00	9 h 12	08:14–09:01 · 16:40–17:27

St Pierre d'Oléron Airfield	Aerodrome	16 km W	6 m
Centre Hospitalier Heliport	Heliport	23 km N	15 m

Description

Île Madame is a French island, bathed by the waters of the Bay of Biscay, off the coast of Charente-Maritime and part of the Charentais archipelago. It is located on the left bank of the Charente estuary, off the small oyster-farming port of Port-des-Barques, the municipality it is administratively attached to, south of the Fouras peninsula. It is connected to the mainland by a tombolo called the Passe aux bœufs. It faces the Pointe de Piédemont, on the mainland, from which it is only 950 meters away. Île d'Aix is 6.80 km to the northwest.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
