FLIGHT CARD

Generated on 21 November 2026

Antoing, Moulin du Rosoir

Heritage · Belgium

GPS coordinates	50.55472, 3.46213
Elevation	35 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Tournai/Maubray Glider Field (EBTY) 3.6 km SE · spot 14 m lower
Spot reference	316410

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Tournai/Maubray Glider Field	Aerodrome	3.6 km SE	49 m
Amougies Airfield	Aerodrome	21 km N	15 m
Warcoing heliport	Heliport	21 km NW	37 m

Description

The Moulin du Rosoir was a former mill located in Péronnes-lez-Antoing, on a small stream of the same name. It first existed as a water mill, before a windmill was built in the 19th century by the Delcourt brothers. This windmill was operated until the end of the century, notably by the Dejonghe family. It was dismantled at the beginning of the 20th century and no longer exists today. No remains survive, but it remains part of the local rural heritage.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
