The Château de Montferrand in Saint Mathieu de Tréviers

Heritage · Hérault

GPS coordinates	43.77700, 3.83981
Elevation	240 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Aérodrome de Saint-Martin-de-Londres (LFNL) 5.3 km NW · spot 58 m higher
Spot reference	316429

Description

Perched on its limestone spur overlooking the garrigue, the 12th-century feudal castle looks down over the plain and offers an unrivaled view of Saint-Mathieu de Tréviers, the Pic Saint-Loup and the Hortus. The site can only be reached on foot, via a beautiful hike that starts in Saint-Mathieu de Tréviers and follows the GR60. While the castle ruins themselves are now closed to visitors for both safety and site preservation reasons, the Château de Montferrand remains an emblem of the Grand Pic Saint-Loup landscape and an exceptional viewpoint. Now owned by the Communauté de Communes du Grand Pic Saint-Loup, the Château de Montferrand is the subject of a multi-year project to enhance local heritage resources.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
