FLIGHT CARD

Generated on 21 November 2026

Les Vincendières - Bessans

Mountain · Savoie

GPS coordinates	45.30840, 7.04447
Elevation	2,084 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Tête De Solaise Heliport 14 km N · spot 466 m lower
Spot reference	316535

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:06	07:38	16:57	17:29	9 h 18	07:38–08:24 · 16:11–16:57

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Tête De Solaise Heliport	Heliport	14 km N	2,550 m
Altiport du Glacier De La Grande Motte	Aerodrome	17 km NW	2,915 m
La Daille Heliport	Heliport	18 km N	1,802 m
Altiport de la Tovière	Aerodrome	19 km NW	2,240 m

Description

Several groups of houses stacked on the steep slope make up the hamlet of Les Vincendières, facing the Charbonnel (3,752 m), both protective and threatening. When residents still stayed through the winter, its avalanches were feared, their blast sweeping across the valley. The whole is a remarkable piece of architecture, with its stone houses whose balconies are lined with bundles of firewood. In summer, the houses are inhabited, so avoid flying over them. Close to LANS-LE-BOURG.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
