Port Racine

Water · Manche

GPS coordinates	49.71247, -1.89588
Elevation	4 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Crossma Heliport 3.2 km S · spot 143 m lower
Spot reference	316637

Spot location and restrictions (Drone-Spot map image)

Arsenal-Premar Heliport	Heliport	20 km E	8 m
Flamanville Heliport	Heliport	20 km S	82 m

Description

This anchorage harbor is reputed to be the smallest port in France! It is reserved for boats up to 5.50 m long and 2 m wide. The surrounding landscapes are reminiscent of the Irish coast. It is no coincidence that the Cotentin is nicknamed "little Ireland". Located at the far western tip of the Cotentin, half an hour from Cherbourg, Port Racine and its surroundings were one of the favorite places of Jacques Prévert, who owned a house not far from there, in Omonville la Petite. From Port-Racine, you can go for a stroll or hike along the coastal path, the GR 223.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
