The Agon point

Water · Manche

GPS coordinates	48.99916, -1.57104
Elevation	3 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Centre Hospitalier Heliport 10 km NE · spot 36 m lower
Spot reference	316647

Spot location and restrictions (Drone-Spot map image)

Description

Protected since 1989, this preserved natural site is well known to walkers and is a must-visit place in our area. Between salt meadows and stretches of sand, the site holds many natural treasures. The point lies south of Agon-Coutainville, separating the Regnéville haven from the sea. The wildlife and plant life are very rich, and some 400 plant species have been recorded there. You can see the salt-meadow sheep living peacefully there, the Agon point lighthouse and a monument in memory of Fernand Lechanteur, a former academic and defender of the Norman language. A hiking trail runs along the point and lets visitors who respect the environment immerse themselves in this peaceful haven.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
