The Nez de Jobourg

Water · Manche

GPS coordinates	49.67801, -1.94830
Elevation	0 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Crossma Heliport 2.9 km E · spot 147 m lower
Spot reference	316655

Flamanville Heliport	Heliport	17 km S	82 m
Alderney Airport	Airport	19 km W	88 m

Description

In the fantastic setting of the Cap de la Hague, 128 meters above the sea, rises the Nez de Jobourg. The view stretches as far as the Cap de Flamanville, and in the distance, on the horizon, the island of Alderney stands out. Whether the sun shines, it rains or the wind blows, the spectacle is always a pure and simple encounter with the power of the elements and the beauty of nature. Following the customs officers' path, walkers see nature in all its forms. The landscapes shaped by wind and waves range from dunes to cliffs and from moorland to pebble beaches. Such is the end of the world. This dizzying setting hides the caves of the Lion, the small church and the large church, at the foot of which many ships once ran aground. According to some local legends, they served as a refuge for tobacco smugglers. Higher up, the little village of Jobourg hides away in the depths of the valleys. …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
