FLIGHT CARD

Generated on 21 November 2026

Chez Franc - Mont-Benoit

Mountain · Savoie

GPS coordinates	45.57854, 6.17779
Elevation	599 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	La Fullie 7.2 km NW · spot 795 m lower
Spot reference	316708

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:10	07:43	17:00	17:32	9 h 17	07:43–08:29 · 16:13–17:00
Sun 22 Nov	07:11	07:44	16:59	17:32	9 h 14	07:44–08:31 · 16:12–16:59
Mon 23 Nov	07:13	07:45	16:58	17:31	9 h 12	07:45–08:32 · 16:11–16:58

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
La Fullie	Heliport	7.2 km NW	1,394 m
Albertville Airfield	Aerodrome	13 km NE	315 m
Aérodrome de Chambéry Challes-les-Eaux	Aerodrome	16 km W	297 m
Crs Alpes Heliport	Heliport	18 km NE	330 m

Description

The small hamlet of Mont-Benoît (553 m), like those of Mont-Benoit-Dessus (659 m) and Mont-Benoît-du-Milieu (627 m) at the foot of the high cliffs of the Arclusaz (2,041 m), bears witness to a farming settlement where, until the 1920s, the elders used to go and mow the meadows of the Arclusaz above 1,300 meters of altitude. The château de Miolans can be seen not far away. The view over the Combe de Savoie is magnificent. Near SAINT-PIERRE D'ALBIGNY

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
