FLIGHT CARD

Generated on 21 November 2026

Le Clos Pointu - Saint-Malo-de-Phily

Water · Ille-et-Vilaine

GPS coordinates	47.87224, -1.78054
Elevation	26 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Saint Sulpice des Landes (LFSS) 14 km SE · spot 67 m lower
Spot reference	316714

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

The former Clos-Pointu quarry is located on the banks of the Vilaine. The water level is rising; eventually it should reach that of the nearby Vilaine. But what a difference in color! As muddy as the Vilaine is, this lake is heavenly: it is turquoise blue, even in pouring rain… Nestled in a ring of cliffs about a hundred meters high, the lake is closed to the public and swimming is prohibited. A footpath has been built along its whole length so you can discover it. In the meantime, the view of the turquoise water is worth the detour on its own. Since 2014, 82 bird species, 17 butterfly species and 13 dragonfly species have been seen and heard on the site.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
