The Cap de la Hague, the port of Goury

Water · Manche

GPS coordinates	49.71536, -1.94745
Elevation	6 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Crossma Heliport 4.3 km SE · spot 141 m lower
Spot reference	316729

Alderney Airport	Airport	19 km W	88 m
Flamanville Heliport	Heliport	21 km S	82 m

Description

Take a stroll around the Port of Goury Once bustling with intense activity set by the customs officers and the passage of smugglers on the coast of La Hague in Normandy, the port of Goury is today mainly known for its rescue station. Built in 1870 in the commune of Auderville, the rescue station of the Société Nationale de Sauvetage en Mer is clad in stone, which gives the place its charm and makes it solid enough to withstand the powerful waves of the tide. The SNSM is one of the 218 stations along the coast that are essential for watching over potential accidents at sea involving residents and tourists who come to the coast. These stations volunteer to rescue people in danger at sea, and they save lives. The village port still shelters fishermen today, and you can see their boats along the harbor, which give the place a special charm. So enjoy a walk to get a breath of fresh air in …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
