Cenise plateau

Mountain · Haute-Savoie

GPS coordinates	46.01950, 6.44914
Elevation	1,708 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Altiport du Col de Cenise 0.2 km NE · spot 16 m lower
Spot reference	316775

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:10	07:43	16:57	17:30	9 h 14	07:43–08:30 · 16:10–16:57
Sun 22 Nov	07:11	07:44	16:56	17:29	9 h 12	07:44–08:31 · 16:09–16:56
Mon 23 Nov	07:13	07:46	16:56	17:29	9 h 10	07:46–08:33 · 16:08–16:56

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Altiport du Col de Cenise	Aerodrome	0.2 km NE	1,724 m
Altisurface de Saint-Roch Mayères	Aerodrome	13 km SE	1,560 m
Centre Hospitalier Heliport	Heliport	18 km SE	546 m
Remontées Mécaniques Heliport	Heliport	18 km NE	1,504 m

Description

I'm taking you to Haute-Savoie for a short drone tour toward the Solaison plateau, and more specifically the Cenise plateau. The imposing cliffs of the Bargy range add a touch of mystery to your adventure, with La Pointe du Midi, la Pointe Blanche and le Jalouvre stretching out in front of us, while the plateau unfolds gently with a slight elevation change. Enjoy the trip...

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=316775

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
