Fresville quarry geosite

Water · Manche

GPS coordinates	49.44274, -1.38004
Elevation	15 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Cherbourg-Maupertus Airport (LFRC) 24 km N · spot 125 m lower
Spot reference	316793

Spot location and restrictions (Drone-Spot map image)

Description

Signposted from the village of Fresville. Laid out around the lake of a former industrial cement production site, this trail lets you discover the geological history of Normandy and the changing landscapes of the site: from marine fossils to limestone extraction, from tectonic deformations to diving birds. 2 km – 2h The Fresville quarry geosite is a real window onto the geological history of Normandy and the evolution of the Cotentin landscapes. Located near the village of Fresville, this trail laid out around the lake of a former industrial quarry invites young and old to a fascinating immersion in the heart of regional geology. The 2 km route, dotted with information panels, takes you back in time several million years. The industrial history of the site is also highlighted: the Fresville quarry was worked for cement production, an activity that deeply marked the local landscape. …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
