Description

Linking the port of Carentan to the sea, it starts between the Douane and Russie districts in Carentan, then passes through the Haut Dick lock at the boundary between the communes of Saint-Côme-du-Mont and Saint-Hilaire-Petitville. Here it receives the waters of the Douve and the Taute, and takes on a more natural form, like an ordinary river. It runs along the boundaries of Saint-Côme-du-Mont and Saint-Hilaire-Petitville, receives the waters of the Grand Fossé du Moulin at the boundary of Saint-Hilaire-Petitville and Brévands, and separates Brévands from Brucheville. It ends at the English Channel in the baie des Veys, more precisely at the passe de Carentan, between the pointe de Brévands and the hamlet of Grand Vey in Brucheville. On the Carentan canal bridge. It crosses the national road 13 via the Carentan canal bridge. A walk well known to the people of Carentan runs along both …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
