Ongles, the Vière site

Unusual · Alpes-de-Haute-Provence

GPS coordinates	44.02379, 5.74170
Elevation	666 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Altisurface de Banon 9.8 km NW · spot 469 m lower
Spot reference	316831

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:08	07:40	17:06	17:38	9 h 26	07:40–08:24 · 16:21–17:06
Sun 22 Nov	07:09	07:41	17:05	17:37	9 h 24	07:41–08:26 · 16:20–17:05
Mon 23 Nov	07:11	07:42	17:05	17:36	9 h 22	07:42–08:27 · 16:20–17:05

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Altisurface de Banon	Aerodrome	9.8 km NW	1,135 m
Aérodrome de Château-Arnoux - Saint-Auban	Aerodrome	20 km E	460 m
Saint Martin de Castillon	Aerodrome	25 km SW	335 m

Description

The origins of the Vière site at Ongles go back to protohistoric times. A first village was probably established on its remains in the 12th century. The old Ongles - Vière site reached its peak in the 13th century thanks to the expansion of the town, economic development and the strengthening of the defensive structures. At the end of the 16th-century wars of religion, these were destroyed, probably with explosives, the aim being to make them unusable. The dismantling of the village was a major shock in the history of old Ongles. The inhabited parts, however, were spared. Indeed, the civilian village was beginning to move toward the hamlet of La Fontaine, abandoning the remote position of old Ongles. In the 17th and 18th centuries, the village was rebuilt with a stronger farming focus. The rubble produced by the demolition of the village provided excellent material for building …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
