Fayence Glider Field	Aerodrome	15 km S	226 m
Cipieres Alpes Dazur ULM	Aerodrome	17 km E	1,155 m
Col de Lèques	Aerodrome	21 km NW	1,126 m

Description

Mont Lachens, rising to 1,714 meters, is an iconic site for free-flight enthusiasts in Provence. Its gentle slopes and thermal currents make it a well-known spot for paragliding and hang gliding, offering ideal conditions to launch into the air. From its summit, pilots fly over breathtaking landscapes of forests, valleys and hilltop villages. Easy to reach and well equipped, the site attracts beginners and experienced pilots alike, supervised by local schools. Between adrenaline and contemplation, Mont Lachens combines sport and nature for an unforgettable experience in the heart of green Provence.
→ You can fly your drone early in the morning, before the paragliding schools arrive, and even as long as the updrafts don't yet allow them to climb above the takeoff point. Near DRAGUIGNAN

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
