The Croix de Chamrousse

Mountain · Isère

GPS coordinates	45.12732, 5.90996
Elevation	2,140 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Altiport du Col De Belledonne 7.5 km NE · spot 660 m lower
Spot reference	316978

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:10	07:42	17:02	17:34	9 h 19	07:42–08:28 · 16:16–17:02
Sun 22 Nov	07:11	07:44	17:01	17:34	9 h 17	07:44–08:30 · 16:15–17:01

Altiport du Col De Belledonne	Aerodrome	7.5 km NE	2,800 m
Aérodrome de Grenoble Le Versoud	Aerodrome	11 km NW	220 m
Altiport L'Alpe d'Huez - Henri GIRAUD	Aerodrome	14 km E	1,860 m
Hôpital Nord Heliport	Heliport	15 km NW	218 m

Description

The Croix de Chamrousse, one of the greatest viewpoints in the Alps, can be reached on foot or by the La Croix gondola from the resort at Chamrousse 1650 – Recoin. Located at 2250m altitude, it overlooks the resort and the Grenoble valley. There you will find a weather station, the third highest in Europe, and a monumental cross. The history of this cross is little known, but it is nonetheless one of the emblematic places of Chamrousse. It dates back to the 17th century and was originally made of wood. Roman medals were discovered at its foot. From here the view is superb over the Belledonne range and the Grenoble valley. Close to GRENOBLE

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
